

In the MERCURY'S Opinion

Save a Few Whites for Posterity

WE HAVE BEEN ACCUSED of many things, some true and some untrue, and one of the true ones is that we are "racist."

Yes, we are. We admit to belief that the White man is vastly inferior to other races and fully deserving of his present plight.

It is a self-evident fact that the stupidity of the White race is exceeded only by its cowardice. The White man is the dumbest creature God has ever planted on this earth—how can anyone say it isn't true?

The Whites are literally too dumb to have any understanding of this war for survival that has been raging since the turn of the century, even though they have been in the middle of it.

They have allowed themselves to be used as pawns and cannon-fodder to better serve the aliens who have directed them.

Like Simon Girty, the White renegade who joined the Indians and whooped and danced with glee as White men were burned at the stake, nothing gives an internationalist a better feeling than to destroy another White person. The high point in White history, they teach, was the total destruction of Hitler Germany—which happened to be the only organized force ever in existence dedicated to the survival of Europe and the White race.

The fratricidal war against Germany is duplicated in microcosm in thousands of incidents daily in the United States and Europe. If you don't believe it, make an experiment. The next time you are with a typical group of non-Jewish, non-Negro liberals or conservatives, say that you prefer the company of your own kind in your neighborhood, school or place of employment. Say that you are against racial integration, and that even the presence of *one* Negro or Jew in a group immediately disrupts the organic harmony of the group. Tell them that even one non-White means that everyone must thereupon be on his guard against saying anything which might hurt that one non-White's feelings—which in turn means that the most important subjects are thereby eliminated from discussion. Tell them that you have no objection to Negro racial unity and Jewish unity but that you think that it is about time to think of White unity and that you resent it that your right to racial privacy has been destroyed.

If you try this experiment you will find that your companions will fall all over themselves to challenge you and condemn you with a response so automatic that it could just as well have been acquired under hypnosis at the Pavlov Institute. The response will be so predictable it is as if they feared that a Jew or Negro might be lurking nearby to report them to the ADL and they had better be on their best behavior and be quick to turn in the White racist among them for immediate punishment, thus assuring their own salvation, for is not salvation of the Jews?

These Whites might wonder (although their limited minds prevent them doing so) why it is in this permissive age of massive questioning, challenging

and muckraking they never feel the urge to turn around and start questioning these who put them up to all this questioning in the first place, to start challenging those who prodded them into doing all this challenging and protesting.

It's no secret to anyone that Blacks are today encouraged to be as openly tribalistic and anti-White as the mood strikes them. The latest work being promoted toward this end is called *Roots* and has been condensed in two parts in current issues of the internationalistic *Reader's Digest* from the forthcoming book by Alex Haley, who has made more than one television appearance to publicize his "saga."

Haley, who like most American Negroes is himself part White, writes that "I intend my book to be as a buoy for Black self-esteem." It is a story woven from Haley's quest to trace his bloodlines back to his original slave ancestor brought in chains from Africa. Aside from being characterized by the usual hatred for Whites and ludicrously transparent, histrionic attempts to portray them as the *real* savages, the book is so heavily fictionalized and saturated with wishful thinking as to remind one of the comment made by the late Dr. Henry Garrett when writing about the deliberate falsification of Negro history by Jewish academicians, specifically by Melville J. Herskovits: "Herskovits is at least candid. In so many words he proposes that history should be enlisted in the cause of Negro equality. Since no such history exists, it is being invented."

Although Negroes have no history, they do have the support of the Jews, which is all they need—at least until the Whites have been extirpated when they will get the same treatment. Anyway, we want to plead for pity on the Whites. They are too dumb to survive without Jewish help and we suggest that a few of them should be kept around on a reservation as freaks so that the future inhabitants of America (who will be a mixture of colored races and White liberals) can view them as extinct species. There will be money in this, as posterity would pay to see live Whites just as today people would pay to see a live dodo bird. So although Whites today are completely without any value either to themselves or to anyone else, it is safe to predict that as their numbers get smaller their value will get greater.

Here is a money-making idea we present to those who profit by unique schemes—a free bonus to subscribers.

MERCURY Warned You—in 1958

"How the sinister Communist program of race mixing could advance so far without noticeably arousing the righteous wrath of American parents will probably forever remain a mystery. Doubtless much of the blame rests on the annual 'Brotherhood' farce. Initiated in 1934 as 'Brotherhood Day' and becoming a full week's observance in 1940, 'Brotherhood Week' under the nominal sponsorship of the self-styled National Conference of Christians and Jews, has become a nationwide Hollywood-style theatrical stunt that plays up anything and everything but true brotherhood based upon the fundamental doctrines of Christianity."
